Blast Traffic To Your Site With A High Search Engine Ranking

If you have a website or blog, chances are you are looking for a fast, simple way to get a high search engine ranking in Google. If you have been looking for any amount of time, you will probably already know there is no quick way to get high website rankings without paying a costly price. That being said, with a little time and effort on your behalf there are some pretty easy things you can do to help increase your rankings without spending a penny! Here are just some of the techniques you can use to get a higher [Google Search Engine Ranking](#).

1st Technique - Do your Keyword Research

Research is probably a word that doesn't sound fun to anyone, but I am afraid it is absolutely crucial. You can use some of Google's own tools to do some of your own Keyword research, such as Google Adwords Keyword Tool. This tool will allow you to see suggested Keywords and how many searches are done on that specific Keyword every month. This will help you to be sure you are not using a Keyword that is high competition, and therefore impossible for you to get a high ranking in.

Second Technique - Social Bookmarking

This step can be pretty quick. Sign up for a Social Bookmarking account at Onlywire and create profiles on all of the Bookmarking sites there. Then you can submit pages of your site to all of the Social Bookmarking sites at once. This creates a ton of links that are linking back to your site, thus giving you a High Search Engine Ranking. Be sure to link more to your index page than the rest of your pages on the site.

Third Technique - RSS Submission

If you don't know what an RSS feed is or how good it can be to getting a high Search Engine ranking, then I suggest you do some research about it on Google. Once you know a little about it, you will want to find RSS submission websites, such as MillionRSS, and submit your RSS feeds to the directory and give millions of people direct access to your RSS feed and website.

If you follow these techniques you will be well on your way to getting a High Search Engine Ranking and making some good money with any product you are selling on your website.
