Benefits of Web Hosting

Today, my mother bought her first domain name -- and with it, she bought her first web hosting plan. Since I happen to make my living online, it was definitely my duty to help her through what could have been a daunting task. She want to have small group of websites from which she want to divide and name it one for blog, the other for a forum for seniors and one more website for her colleagues who can share coupons of different stores from which they usually do shopping. Obviously she should select a host with a certain plan which support unlimited domains when i came to know about her web hosting plans.

You can buy unlimited domain names and have it under one host server under one plan. So, in essence, after purchasing such a plan, you could buy a domain name every day from here on out, and never have to buy hosting again. You can host every last one of those domains with your one hosting plan. Get best hosting with this [Hostgator Coupons](#).

Given below are 3 advantages for selecting such a web hosting plan.

1. Convenience

The most important thing you have to look in a web hosting plan it should provide central administration control panel and must support multiple domains. Through my singular control panel i can add WordPress for one site and can create new email addresses for different websites i have and Joomla for my other web site.

Because my plan holds unlimited domains, I can also reach the actual server directories for all of my different websites via ftp by logging in just once. It's truly time saving for me, before i used to have make multiple logging's and log out's but now if i have any stuff to upload to any of my 2 or 3 websites i can do it very easily.

2. Reliability

I won't say who my hosting company is, but they are VERY reliable. And I feel confident that all of my websites are in good hands. My mother chose the same company for her hosting plan, and her websites will be in good hands as well.

I have multiple websites and i can be relaxed as all of my sites are with one hosting company who offers unlimited domain hosting and it's more reliable, so i don't have to worry about my sites as all the sites will have same level of service

If a web hosting company has good track of up time, then ALL of my sites are available at any given point of time. If you have hosted all of your domains on different servers, you may face downtime as these servers might experience problems.

3. Affordability

Last but not least, web hosting plans with unlimited domain hosting are usually very affordable. It is not uncommon for you to be able to purchase such a hosting plan for under \$10 per month.

You might be having a plan that how much sites you want to create and depending on it select such a plan which could save you thousands of Dollars.

Though there are were lot of advantages but my mother got convinced with just unlimited domain pack. Get more tips on [Best Reseller Hosting](#).
