# **Five Tips To Get Loads Of Traffic With Or Without SEO Submission Software**

On the Web, the most Critical key to success is Targeted Traffic. The more visitors, the more money you will make. Hopefully you have chosen a niche and have already found your keywords. Keyword research is a must in order to have success. Of course, owning [SEO Submission Software](#) will dramatically help your Website, but if you don't own any, here are five things you can do to get website traffic fast.

### 1. Tag Keywords.

Tags are where search engines look and if there are no tags your Site may not get indexed. There are numerous tag types including Title tags. Title tags are a crucial place to put your Keywords. This is what they look like - Keyword Rich Title Here The Title will describe your Site content in less than 90 characters. Other Tags include Header Tags, Keyword Tags, and Alt Tags. Make sure your Website contains all of these Tags for full SEO if you don't own SEO Submission Software.

### 2. Update Frequently

Content is necessary for targeted traffic and a high search engine ranking. Content is what Search Engines, like Google, look for and index. Without content on your Website there would be nothing to Index. Give visitors and search engines a reason to visit and index your site. Make a commitment to provide daily, quality content and your traffic will soar.

### 3. Get Quality Backlinks

Having more Sites back-link to you, Search Engines see this as your Website being more relevant, though not all links are made equal. Search engines put more weight on links from sites which are popular and credible and from sites which are relevant to your Website's topic.

There are different types of links. A direct-link looks like a basic website address. A text hyperlink is when the webpage address is embedded in the text. People would simply click on the Hyperlink would be redirected to your Site. If the links is to an internal web page rather than your Website's Index page, They are called "deep-links."

Some ways to get backlinks to your Website are:

Frequently adding quality content to your site.

Writing Articles and Submitting them to Directories.

Publish a Press Release for your Site.

Blogging and participating in social networking forums, chat rooms and social networking sites. [SEO Submission Software](#) can greatly increase the speed and success of your submissions submissions, saving you time and money.

### 4. Being Social!

Online marketing is about building a community. Whether you offer a forum on your website or you join in social networking sites, social networking is a valuable traffic generating tactic. SEO Submission Software automate this process for you, but if you do not own one you can still participate manually.

### 5. Advertise To Gain Exposure

Advertising should be used to promote your content and products or services. PPC advertising is often the tool of

choice because you control your daily budget and have the features track your results.
