Introduction FatCow Webhosting

A treasure demands care and protection. In this age your prized possession or image lies in your website which mandates that it is handled by a safe and trustworthy web host. Just a little bit of research on the options available will lead you to FatCow with its attractive web hosting features ensuring full support and minimum downtime all at an unbelievably low rate. FatCow is a leading web host company providing services all over the world and receiving good reviews for its niche client service and various add on tools all with an economical price tag.

The cut-throat competition in web hosting company is blurred when FatCow is compared with other companies. Along with a variety of technically advanced features it provides a full time customer support service too.

It ensures maximum income to you through its marketing tools in collaboration with Google and social networking sites with \$50.00 credit for Google Adwords and Facebook. Marketing tools include credit up to \$50.00 in Google Adwords and Facebook Advertising.

Reliable backup servers are the hallmark of FatCow's service. Accessibility is crucial for websites and FatCow ensures it with a round-the-clock system to monitor sites hosted by it. Dedicated staff immediately arrange for backups during any break in connectivity. Backup systems are up and running in the blink of an eye.

Customer support service promptly settles any queries you may have. FatCow's HeiferCratic Oath promises excellent customer service based on a set of principles set by them promising you account credit for a month should they be found lacking. FatCow, a conscientious eco-friendly corporate goes a step ahead and uses only windmills for maintaining its global servers in an attempt to curtail greenhouse emissions.

FatCow's list of services encompasses web hosting, unlimited domains, website creation and maintenance. All of these features plus technical support, tutelage features and many others comes at a very nominal rate for all customers. Its uniqueness is maintained in its pricing also with a one price has it all plan. Rather FatCow comes with a single plan containing unlimited bandwidth, domain and storage for each account.

The security promise is kept by using BGP gateway protocol for connecting two Firewalls and M71 routers. The site also assures you of a money back guarantee should you be dissatisfied with their services. FatCow is your ultimate answer for the best support, price and unconditional protection along with various other features ensure you get the most out of your website.
