# **Top 5 Reasons You Need To Get SEO Submission Software**

If you have a Website you want to make any sort of money with, you will know how important SEO is to it's very survival Online. While there are things you can do to help increase your Website Rankings on your own, they tend to be time consuming and overwhelming at times. This is why I decided to put a list together of the Top Five Reasons one should use [SEO Submission Software](#).

### 1. Time

First on the list is inevitably the importance of saving time. In the business world, or any other world for that matter, time is money! Considering the fact that some SEO Submission Software will Submit Articles, Social Bookmarks, RSS Feeds, etc. in around 1/4 the time (from my experience) it would normally take you to manually submit these items, it is easy to see right off the bat why this would be considered a wise investment.

### 2. Money

If it's true that time is money than the second item on my list is just that - Money. Not only will you start making money faster while saving your valuable time, you will also be saving a potentially large amount of money in the long run.

### 3. Ease

Besides saving you money in the long run and your time right now, using software to help your SEO efforts will also make the process a whole lot more user friendly. Almost all SEO Submission Software programs are fully automated for you, taking you step by step through it all. This is excellent for the non-tech savvy, as I was, as it guide you through the whole process from setting up accounts, to the actual submission of your content. This makes what could have been a complete Nightmare a pure delight.

### 4. Hassle

Fourth on my list is the hassle software will save you. Besides the manual creation of accounts and submission of content, most SEO Submission Software will save you the hassle of having to research online for places that will accept your content. Software I have seen will typically come with a list of sites built in, and some only select the sites that are important to Google. This will only help your Site's Google Ranking.

### 5. Quitting

Last but not least, using a good SEO Submission Software can keep you from doing what most new affiliate marketers do - Quit. It's easy for one to become frustrated, tired and overworked while see little results, if any, without having some sort of help. Having Submission Software is like having an employee help you with the work load. With [SEO Submission Software](#) you will see faster results, make money more quickly, and, most important, make you likely to give up before you reap any rewards.

To find out which SEO Submission Software I personally use and recommend, Click the Hyperlinked words in this Article.
