'Web 2 Mayhem Review - The Powerful Web2Mayhem Revealed!'

I've tested the [Web 2 Mayhem Review](#) System made by Jason Potash and Jason Katzenback and I fully confess that Web two mayhem truly delivers exactly as it claims.

For a year or 2 now, I've been carrying out web2.0 marketing with a bit of success before I tried the Web 2 Mayhem Review System. I have been using Hubpages, Squidoo, Wetpaint and Weebly to market my own products and affiliate sites with excellent results.

I've got to say that Web2.0 truly and actually does work if you actually know the way to take advantage of these hot Web2.0 properties to catapult your website into top 10 ranking in major search engines i.e Google, Bing & Yahoo.

Here's what I did before I used the Web 2 Mayhem Review System to automate my Web2.0 marketing...

1. Outsourced my article writing
2. Utilised the Human powered articles spinning service
3. Outsourced the posting of articles to various web2.0 sites such as Hubpages, Squidoo & Wetpaint
4. Outsourced book marking services for the promotion of my hubpages, Squidoo lenses (this step is particularly powerful if you really want to see top ten ranking in Google within weeks).

Web2.0 usually ranks very well in search engine as major search engines really love these sites, but here's the what most people don't do, they DO NOT PROMOTE their web2.0 pages.

From my experience, this step is imperative if you want your Web2.0 pages to rank high and with a little bit of luck, stay in top 10 ranking for the longest time possible. (I even buy links from Linkvana to link to all my web2.0 pages).

Another important thing that separates those making tons of money with Web2.0 properties and those who make tiny money is their approach in using these hot properties.

if you would like to make real good money in very little time without or with websites, a great tiny secret tip I can offer you now is to build your web 2.0 pages only on branded products only thus only submitting product review articles to these fantastic web2.0 sites.

Target your keywords to brand related keywords such as "Brand A review", "Brand A scam", "Buy Brand A" and so on...

These keywords are strongly-targeted and your probability of making a sale on these keywords are HUGE!

If you do this right, I can make sure that you revenue will soar inside a few weeks especially you follow step four above.

I was reluctant to use Web two Mayhem initially, after many calls from my chum, Jodie, who was a beta tester on Web 2 mayhem with great success, I finally signed on.

I did my first test with Web 2 mayhem with one of my Hubpages with serious competition and this Hubpage rank twenty-three before I used Web two mayhem.

I have to explain what the [Web 2 Mayhem Review](#) System really does.

Web 2 mayhem uses the most recent in Web 2.0, Social bookmarking, RSS Feed services, software submission services, article directories, podcasting and Video submission services to take articles you create yourself and spun them using a spectacular content spinner software, into hundreds, if not thousands of fresh new articles

which you can then submit them to the services listed above for a large inflow of backlinks and internet traffic. Web 2 madness follows on from software like SEnuke, but takes it to a complete other dimension with a 20 step coaching course, active forum and heaps of useful tools and info to guarantee all your efforts are valuable and contributing to your success.

After using Web 2 mayhem, and with the creation of 10 accounts for bookmarking (the software can create this accounts for you immediately), I was able to catapult this Hubpage to 5 in Google inside 8 days of bookmarking with 10 accounts.

And the best things is, with human powered content spinning services, I was able to submit these spin articles to all web2.0 sites with a hint of a button, and inside another two weeks, my other web2.0 pages (Squidoo lenses, Wetpaint) rank 8 & 10 in Google for a similar keyword.

The power of Web 2 Mayhem Review System is so great that it allow you to submit spinned articles to all web2.0 sites and give you the chances to control search site by having multiple listing on the 1st page of Google, Yahoo & MSN, for any keywords you would like.

The Web 2 Mayhem Review System makes web2.0 selling 10 times stronger and efficient. If you so desired, you might even hire or outsource someone to do the submissions of articles with Web 2 mayhem for you, but its also fun and simple to do it yourself.

Remember, Web 2 Mayhem Review System also enables you to submit your video to varied video sites podcasts to podcast directories, PAD software submissions to software submission sites and it also encourages you in terribly easily followed, step-by-step tutorials, how to submit your articles to directories and cleverly link back to your web2.0 properties at the same time, increasing your all round backlinking possibilities.

The [Web 2 Mayhem Review](#) System really is too complex and powerful to sum up in a short review. I encourage you to take a trial spin and check out the results for yourself. I'm sure you'll be utterly amazed at its power and complexities.
