# **Web 2 Mayhem Review - The Spectacular Expanse Of Web2Mayhem Exposed!**

I've tested the [Web 2 Mayhem Review](#) System created by Jason Potash and Jason Katzenback and I fully confess that Web 2 madness actually delivers exactly as it claims.

For a year or two now, I've been carrying out web2.0 marketing with a bit of success before I attempted the Web 2 Mayhem Review System. I have been using Hubpages, Squidoo, Wetpaint and Weebly to promote my private products and affiliate sites with excellent results.

I must say that Web2.0 really and actually does work if you actually know how to capitalize on these hot Web2.0 properties to catapult your site into top ten ranking in major search engines i.e Google, Bing & Yahoo. Here's what I did before I used the Web 2 Mayhem Review System to automate my Web2.0 marketing...

1. Outsourced my article writing
2. Utilised the Human powered articles spinning service
3. Outsourced the posting of articles to various web2.0 sites such as Hubpages, Squidoo & Wetpaint
4. Outsourced book marking services for the promotion of my hubpages, Squidoo lenses ( this step is particularly powerful if you really want to see top ten ranking in Google within weeks).

Web2.0 usually ranks very well in search engine as major search engines really love these sites, but here's the what most people don't do, they DO NOT PROMOTE their web2.0 pages.

From my experience, this step is imperative if you want your Web2.0 pages to rank high and with luck, stay in top ten ranking for the longest time possible. ( I even buy links from Linkvana to link to all my web2.0 pages ).

Another very important thing that separates those making tons of money with Web2.0 properties and those that make little money is their approach in using these hot properties.

If you want to make real good money in very little time with or without websites, a great tiny secret tip I can give you now is to build your web 2.0 pages purely on branded products only, so only submitting product review articles to these fantastic web2.0 sites.

Target your keywords to brand related keywords like "Brand A review", "Brand A scam", "Buy Brand A" and so on...

These keywords are highly targeted and your probability of making a sale on these keywords are HUGE!

If you do this right, I can make sure that your earnings will soar within weeks particularly you follow step 4 above.

I was disinclined to use Web 2 Mayhem initially, after many calls from my friend, Jodie, who was a beta tester on Web two chaos with major success, I eventually signed up.

I did my first test with Web two madness with one of my Hubpages with serious competition and this particular Hubpage rank 23 before I used Web 2 chaos.

I must explain what the [Web 2 Mayhem Review](#) System really does.

Web two madness uses the most recent in Web 2.0, Social bookmarking, RSS Feed services, software submission services, article directories, podcasting and Video submission services to take articles you create yourself and spin them using a impressive content spinner software, into hundreds, if not thousands of fresh new articles which you can then submit them to the services noted above for a giant inflow of backlinks and net traffic. Web 2 chaos follows on from software like SEnuke, but takes it to a complete other dimension with a 20 step coaching course, active forum and tons of useful tools and info to ensure all your efforts are valuable and making

a contribution to your success.

After using Web two madness, and with the creation of ten accounts for bookmarking ( the software can create this accounts for you instantly ), I was able to catapult this Hubpage to 5 in Google within 8 days of bookmarking with ten accounts.

And the best things is, with human powered content spinning services, I was able to submit these spin articles to all web2.0 sites with a touch of a button, and within another 2 weeks, my other web2.0 pages ( Squidoo lenses, Wetpaint ) rank 8 & ten in Google for a similar keyword.

The power of Web 2 Mayhem Review System is so great that it allow you to submit spinned articles to all web2.0 sites and give you the chances to rule search engine by having multiple listing on the 1st page of Google, Yahoo & MSN, for any keywords you want.

The Web 2 Mayhem Review System makes web2.0 promoting ten times stronger and efficient. If you so desired, you might even hire or outsource someone to do the submissions of articles with Web two madness for you, but its also fun and easy to do it yourself.

Remember, Web 2 Mayhem Review System also enables you to submit your video to diverse video sites podcasts to podcast directories, PAD software submissions to software submission sites and it also encourages you in terribly easy to follow, step-by-step tutorials, how to submit your articles to directories and cleverly link back to your web2.0 properties at the same time, adding to your all round backlinking prospects.

The [Web 2 Mayhem Review](#) System really is too complex and powerful to sum up in a short review. I encourage you to take a trial spin and check out the results for yourself. I'm sure you'll be utterly amazed at its power and complexities.
